SPAS

ALWAYS A SPA THAT SUITS YOU

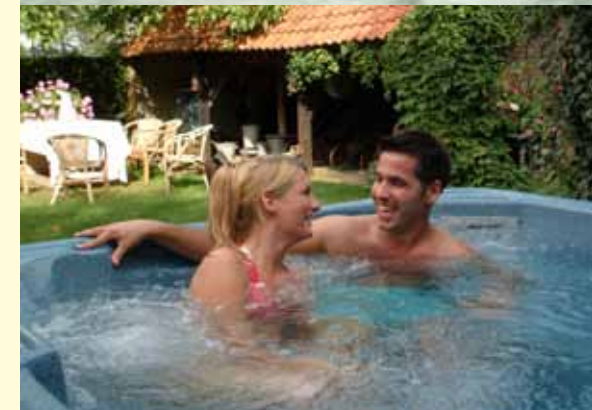

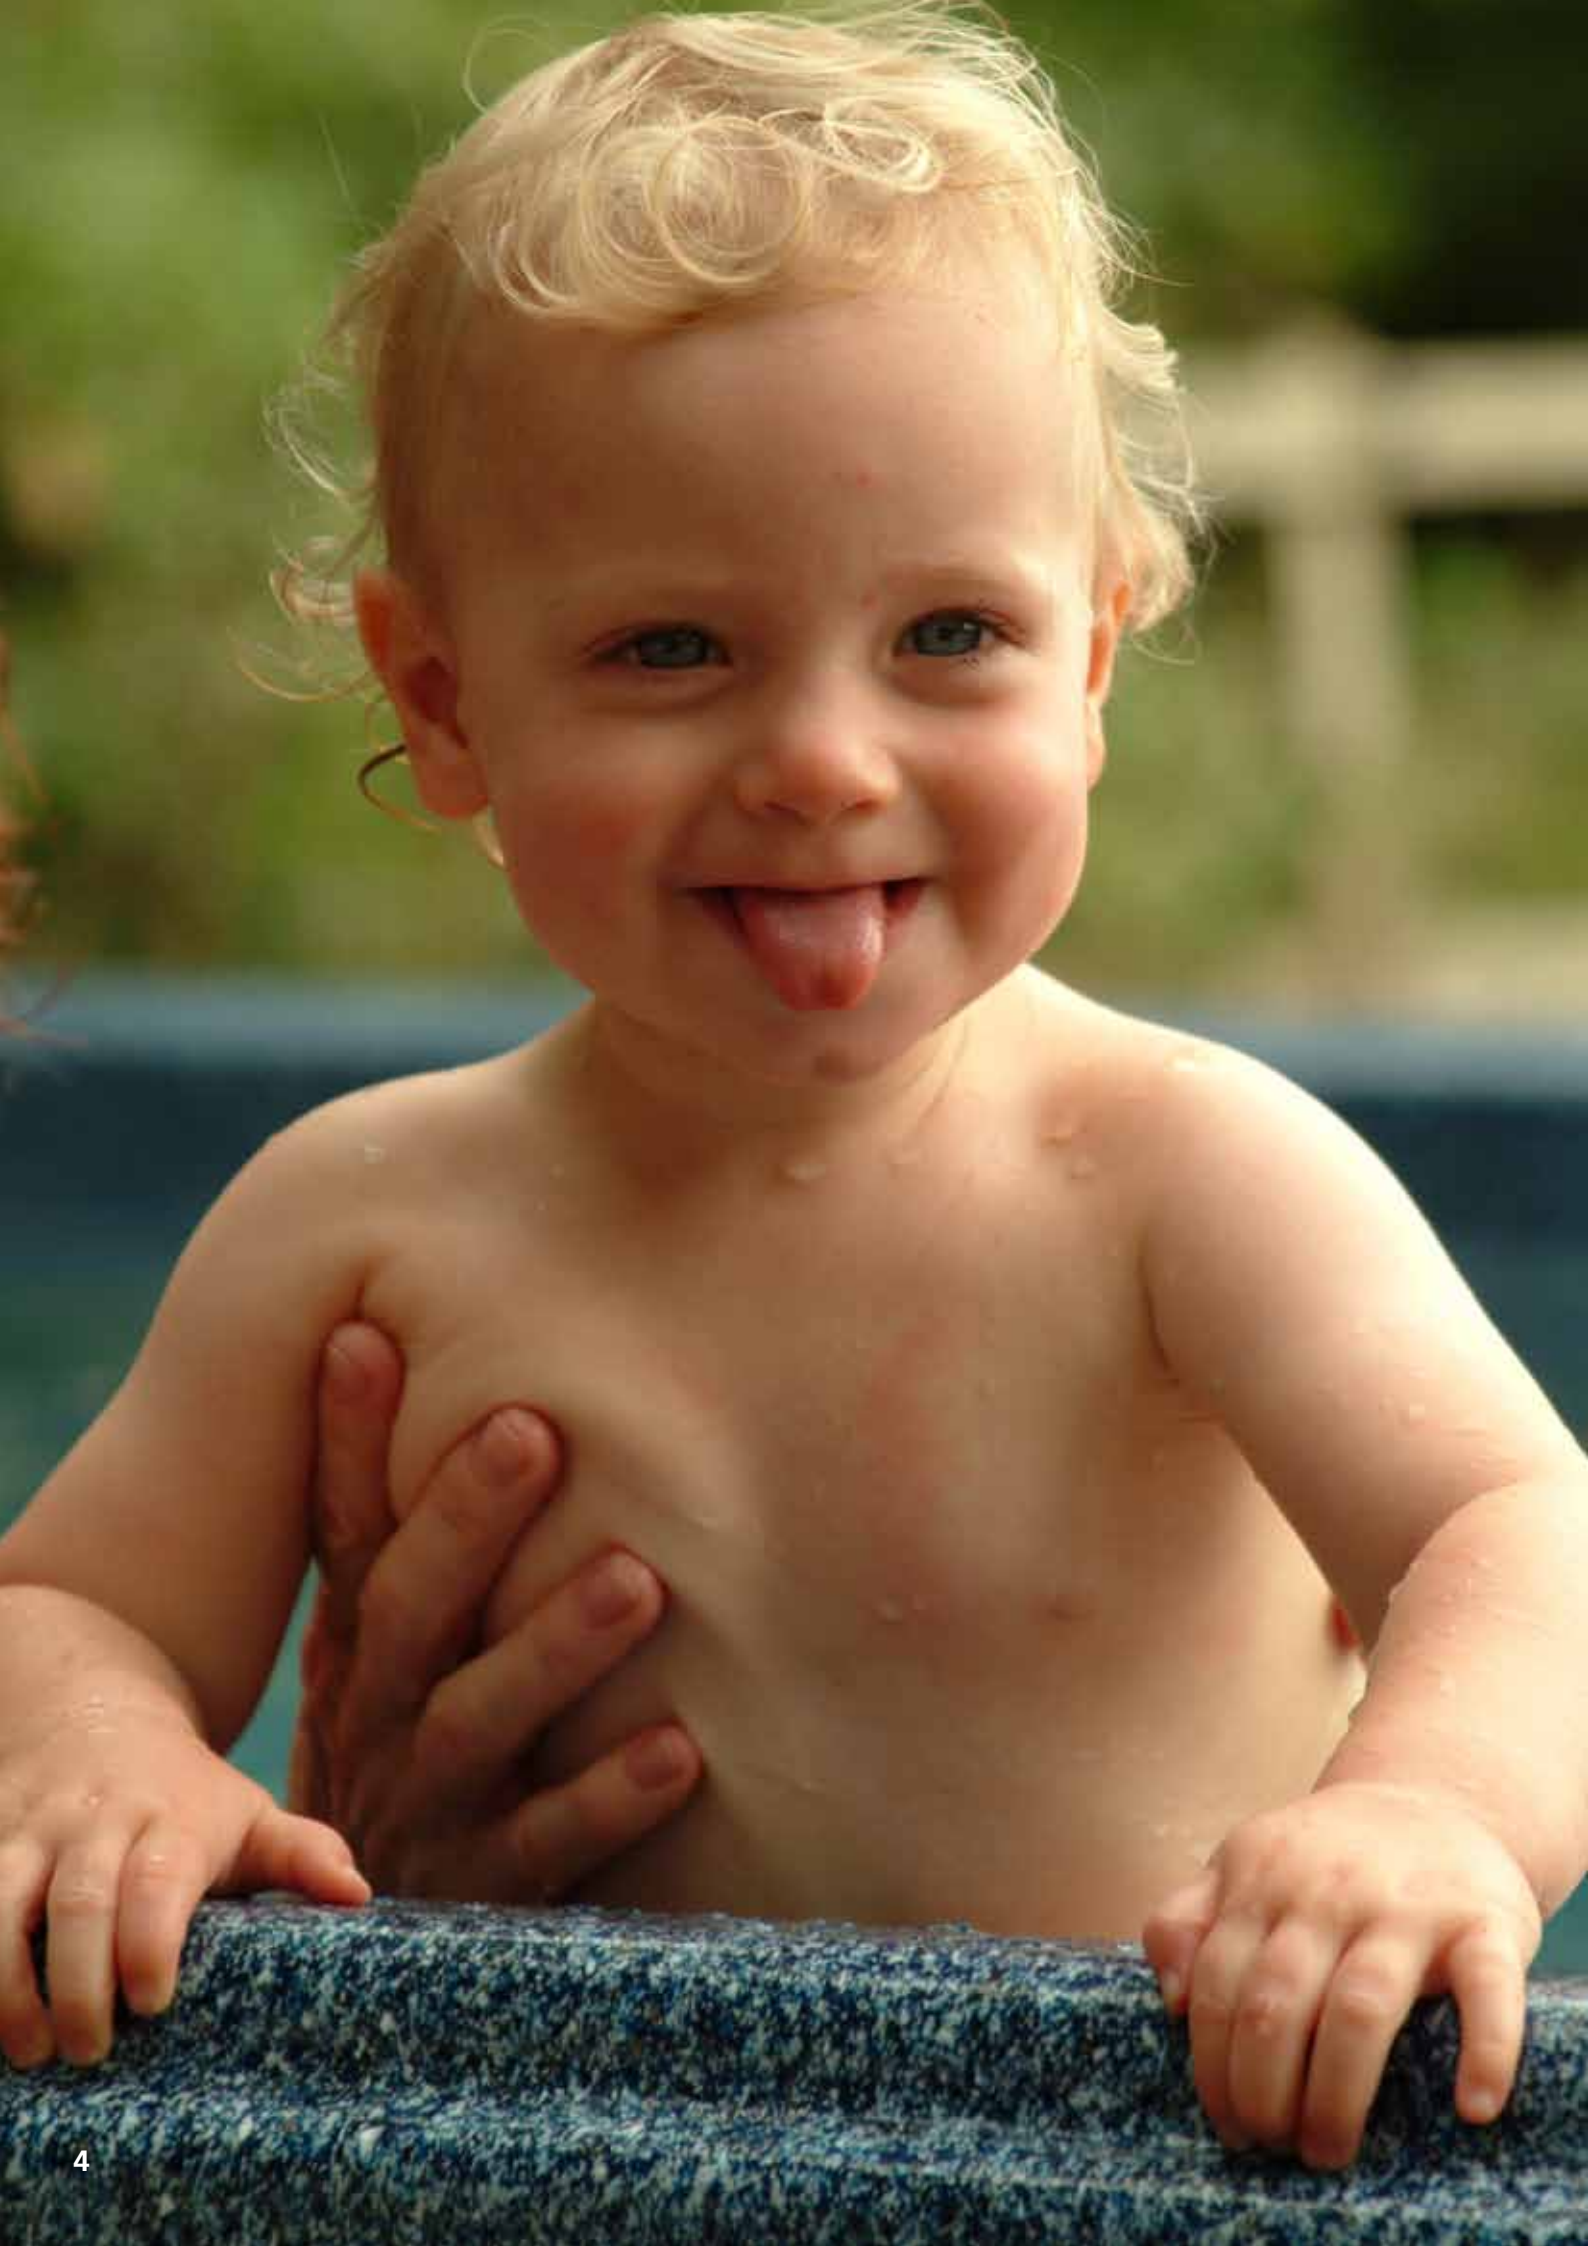

ENJOY YOUR OWN SPA ON A DAILY BASIS

A relaxing massage in a hot, hydro-massage spa! You will really enjoy our spas! Install your FonteynSpa in the garden or on the terrace for every day use, in winter and summer. All you need to do to enjoy the stimulating and relaxing hot water massage is to get into the spa. After taking a bath in our spa your day's tiredness and stress disappear and you will have a great nights sleep.

The therapeutic benefits of hot water have been known for centuries. With every session you can reduce pain and inflammation of the joints. The force of the water jets can be adjusted from a calm and relaxing current to a strong massage to relax tired and sore muscles. Therefore, the body rids itself of muscular pains more rapidly. At the same time the veins in your body expand in the hot water. This helps the blood flow to reach all extremities of the body and reduces the pressure on your heart.

All our spas have ergonomic designs so that your body adopts the most comfortable position while the stimulating water does its work.
